ABOUT RESUME CONTACT

## About

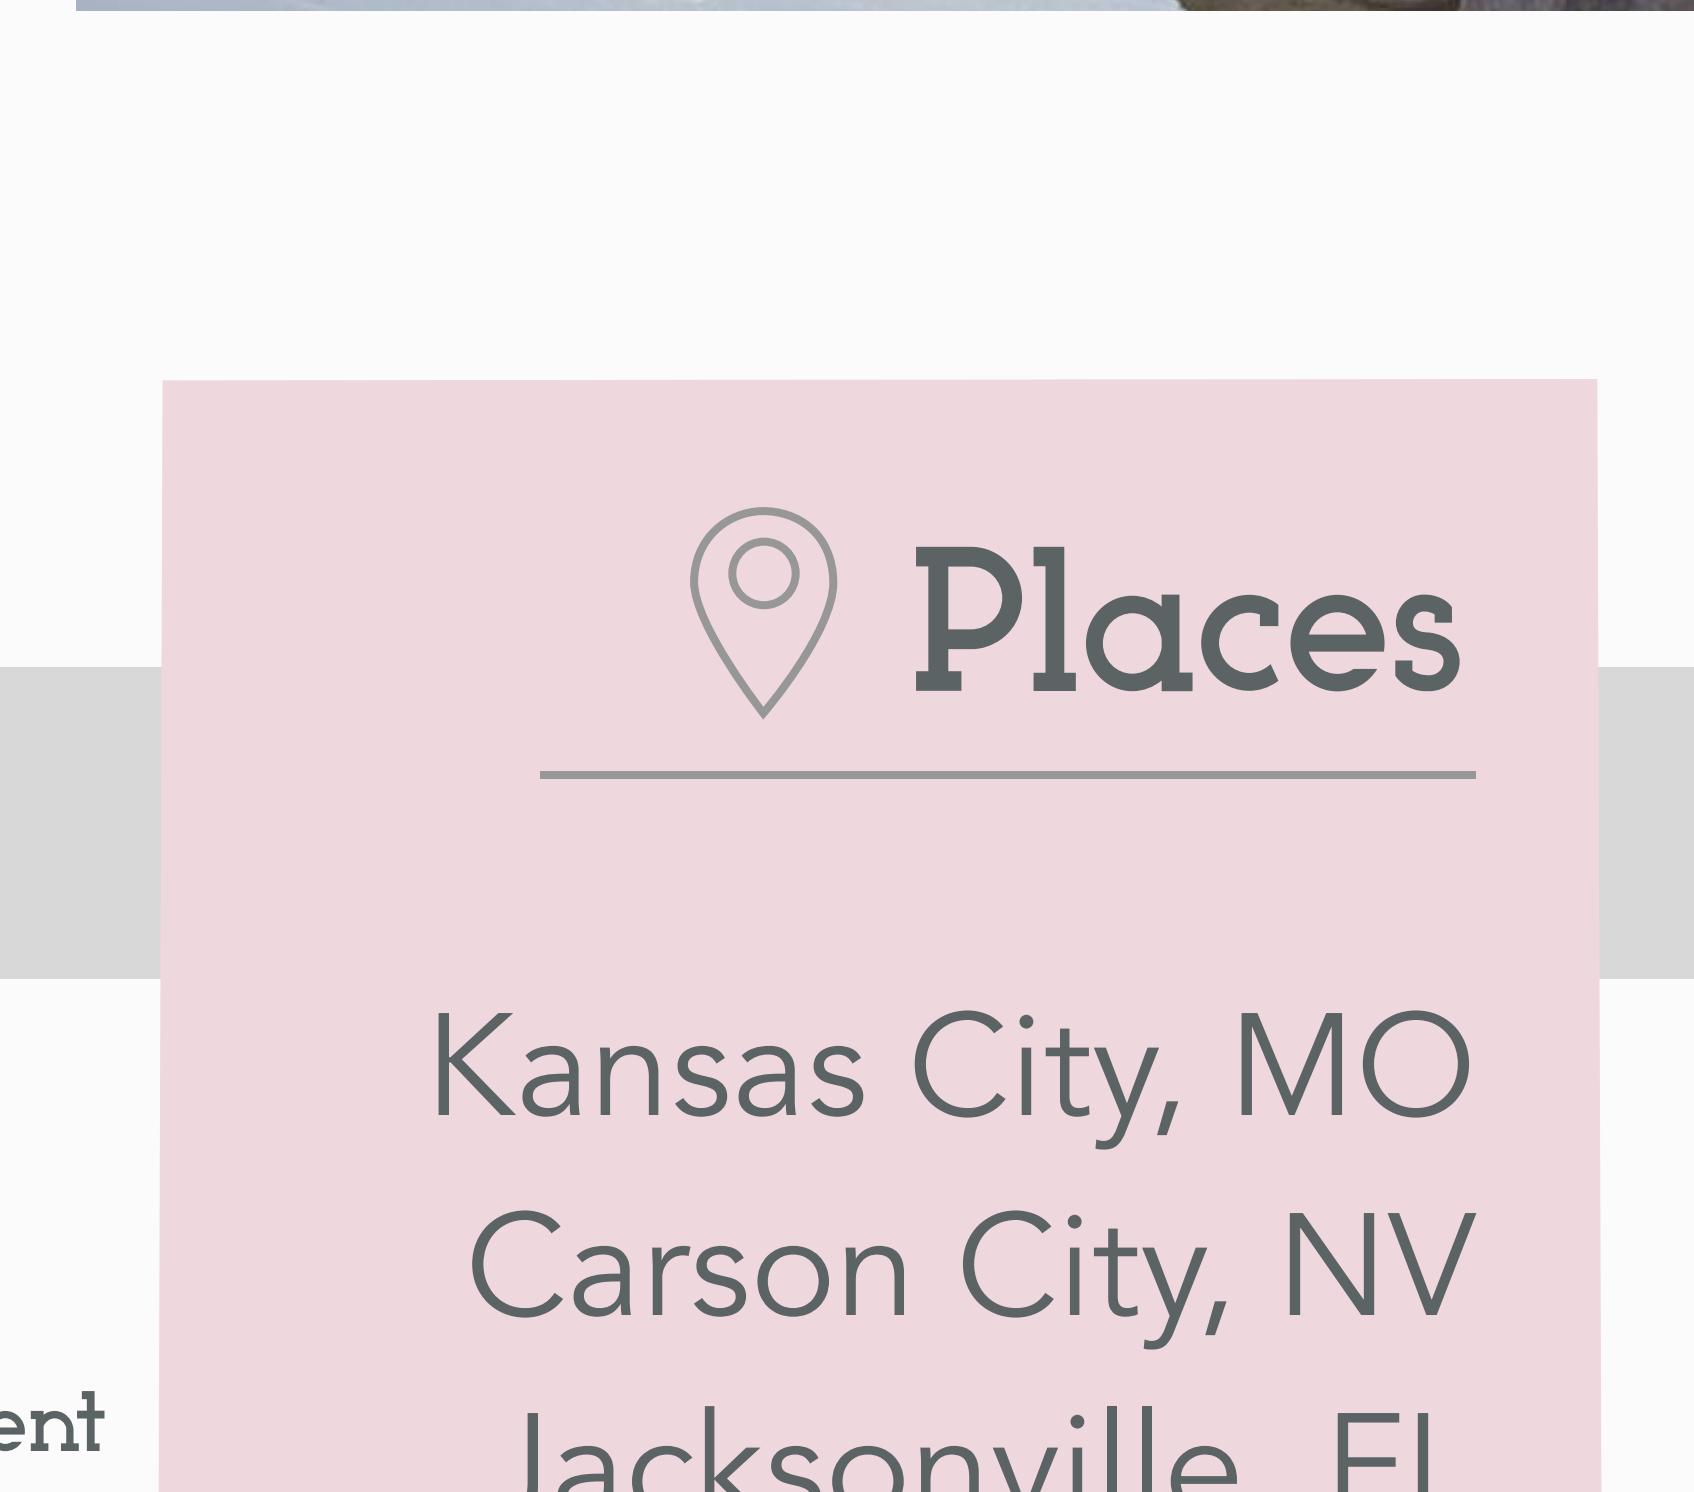

Hello! I'm Regina Yan, a '19 at Dartmouth. I'm an Engineering modified with Studio Arts major, an outdoors enthusiast, a Snapchat artist, a foco dessert concoction creator, and a DALI designer.

I joined DALI Lab my freshman spring. I really love the creative process of designing, especially the beginning stages where there are so many different ideas and visions that literally keep me up all night.

Growing up, my favorite animal was a worm. I have a middle initial, L, but no actual middle name. Hmm. Does living in Kansas count as a fun fact?

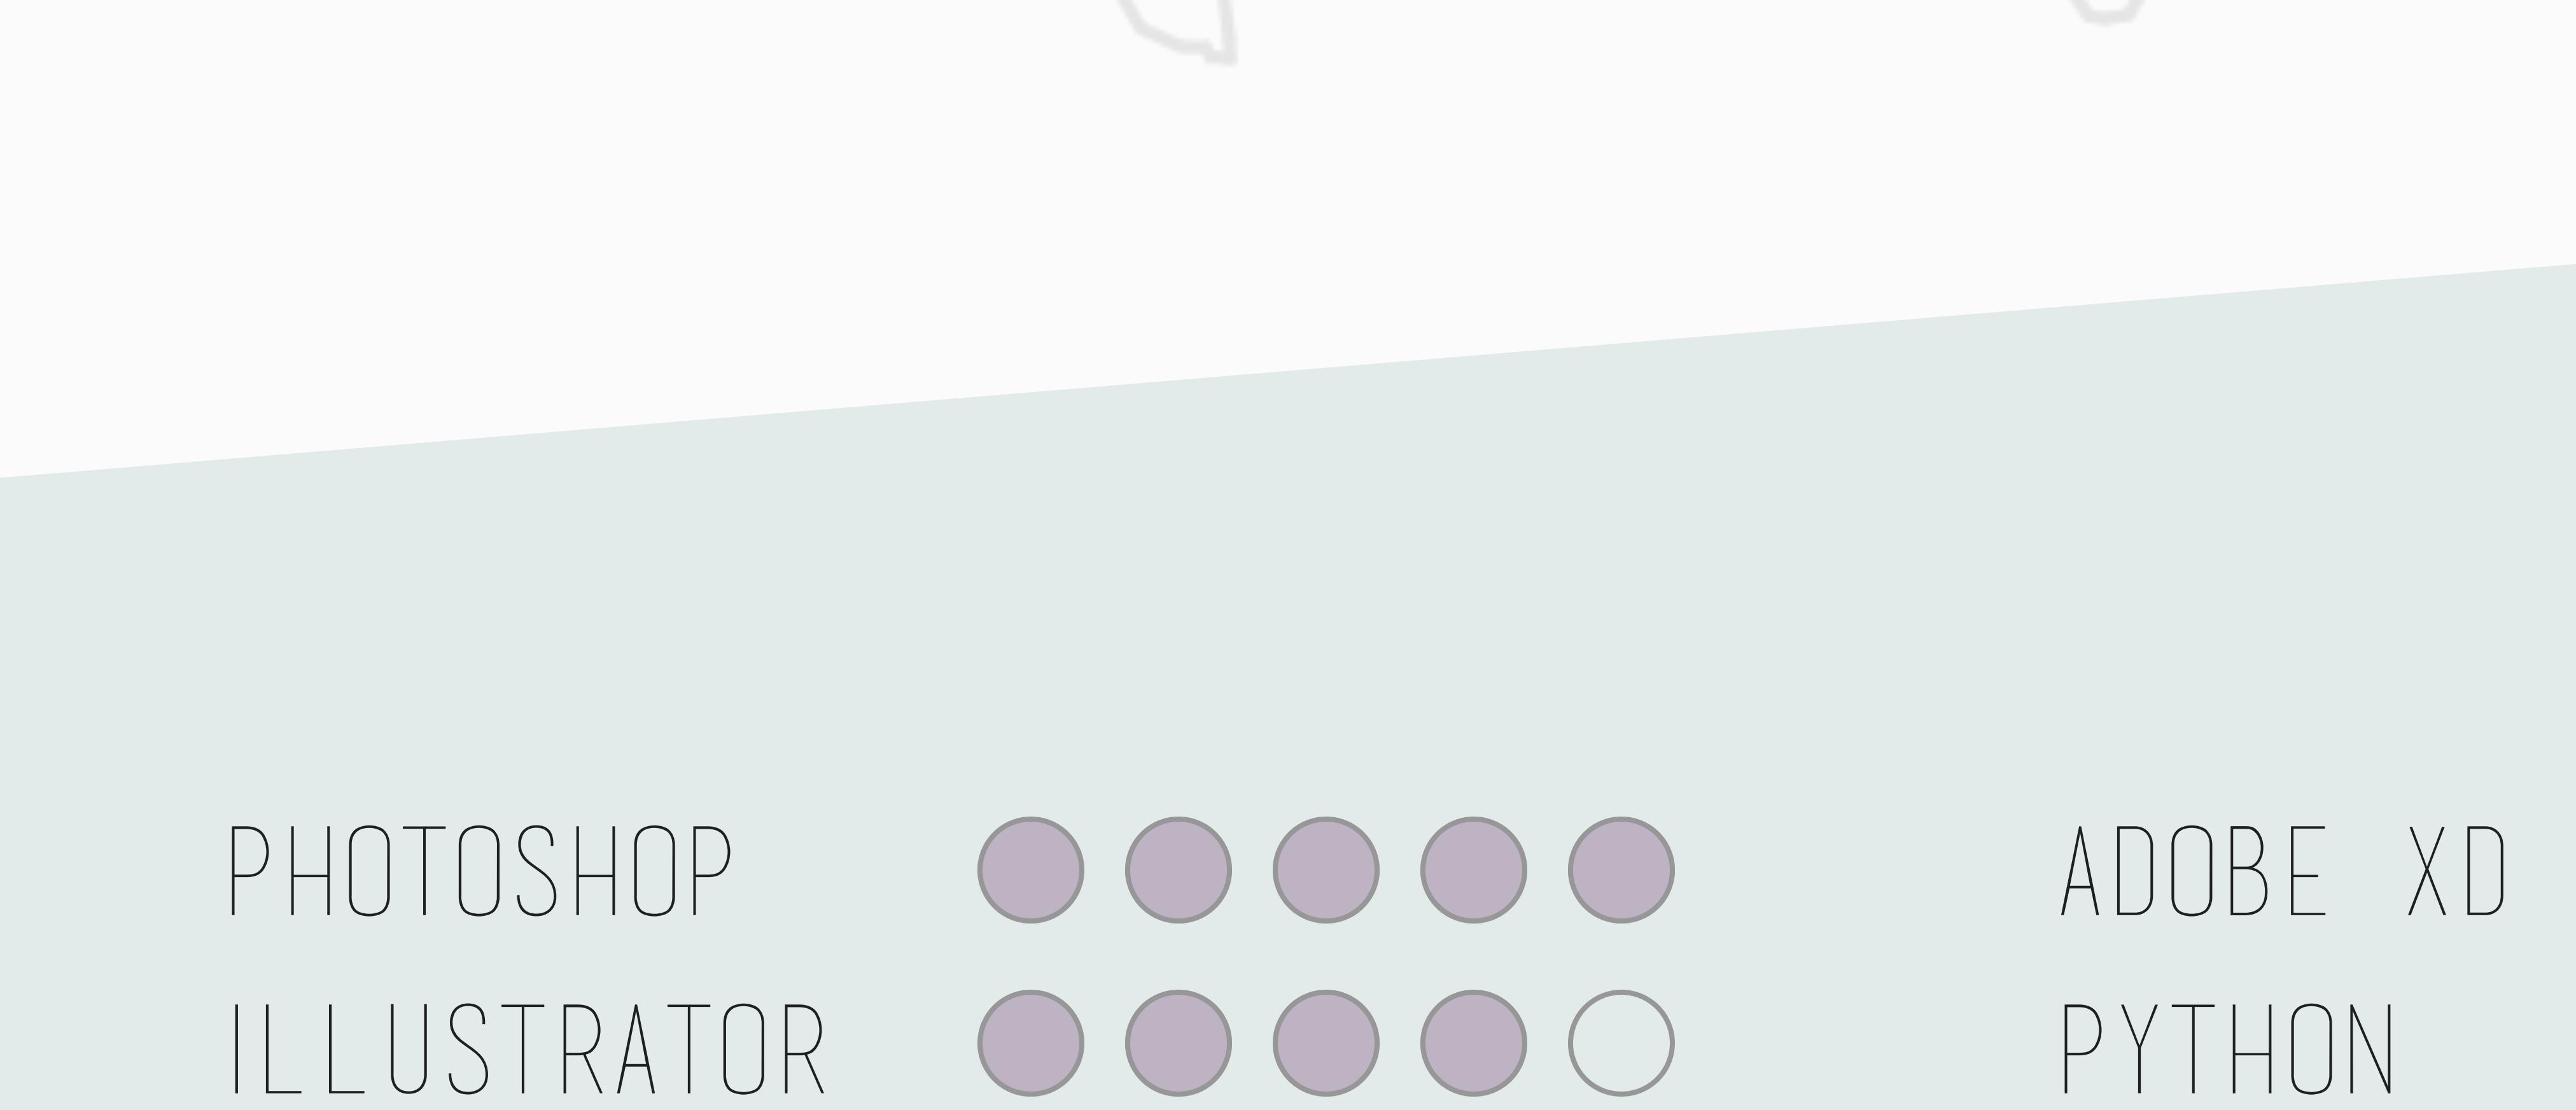

### Hobbies

In addition to DALI Lab, I'm involved with the figure skating team, Dartmouth Mountaineering Club, and Christian Union

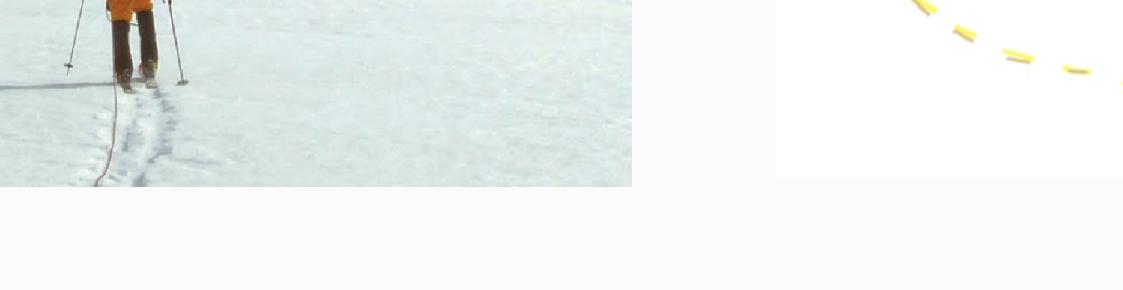

### Places

Kansas City, MO  
Carson City, NV  
Jacksonville, FL  
Eden Prairie, MN  
Overland Park, KS  
Hanover, NH

### Design

I chose a muted palette to reflect a relaxed, carefree vibe, and went with fonts that were easy on the eyes but had some slight quirkiness to them — for example, the Arctic font has interesting serif design, easily seen in the letters "c" and "t".

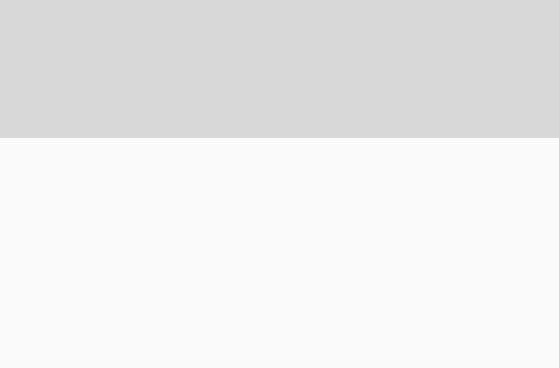

I created the icons through sketch's vector tool and used those to emphasize my minimalistic theme.
